## PRODUCT DESCRIPTION

The AÑEJO RESERVA SERRANO HAM is produced from materials selected and prepared at our facilities in the province of Zaragoza. We use fresh pork that is subsequently salted, dried and matured in our natural aging facilities in Fuendetodos. By the time these hams have reached the optimum state for consumption, they will have been curing for a minimum of 20 months.

The BONELESS AÑEJO RESERVA SERRANO HAM is a single ham, presented with a V-cut and trimmed or untrimmed (clean at the front).

## PRESENTATION

The commercial presentation of the finished product consists of an entire boneless ham, pressed and vacuum-packed in a bag that has been labelled with our registered brand name MARIANO GÓMEZ and features all of the current legally required indications. The weight of the ham ranges from approximately 5.5 to 7 kilos.

Once packaged, they are weighed, labelled and placed in cardboard boxes, either singly or in pairs. This facilitates their handling, transportation and preservation until they reach the point of sale.

## ORGANOLEPTIC QUALITIES

The product's characteristics are those of the ham from which it is made: colour somewhere between pink and red, a slightly salty flavour, and the aroma resulting from a long, slow drying process in natural drying facilities.

## PRESERVATION AND CONSUMPTION

To ensure optimum preservation we recommend storing the product in a refrigerated location, away from strong odours. We also recommend opening the bag at least 30 minutes before consuming the product.
